Please indicate below, by completing either Option A or Option B, how you wish your AVCs to be invested.

At retirement your investment units will be cashed-in and the proceeds paid to a pension provider of your choice (e.g. an insurance company). Your pension will then be paid by your chosen provider. You can normally take up to 25% of your fund as a tax-free lump sum.

Selected Retirement Age

Please indicate your intended retirement age which may be any age from age 55:

Now, please choose either A) the Default Option OR B) provide your own Self-select Investment Options:

A) Default Target Date Fund Option

I wish the Default Target Date Fund Option to apply to my plan (please tick box)* ☐

*If you pay regular contributions into the Scheme or have previous funds in the Scheme please note that by choosing the Default Target Date Fund Option any existing funds and all future contributions will be switched into this Fund.

The Target Date Funds comprise a series of funds of different 'vintages' (e.g. 2038 - 2040), intended to match the selected retirement date of the member. Each fund is managed with the aim of giving the member the highest possible pension income after taking into account the number of years over which contributions will be made to their fund. The funds invest across a range of asset classes and the mix of assets in the fund will change over the life of the fund.

OR B) Self-select investment options

I wish to make my own selection of investment funds (please tick box) ☐

If you choose Option B, any existing funds will be re-apportioned to match your choice of investment options and all future contributions will be invested in line with your choice(s) as indicated below.

If you have chosen Option B, you must select one or more of the following investment funds before your AVCs commence. If no choice is indicated or your choices do not add up to 100%, the contribution or remaining contribution will be invested in the Default Target Date Fund Option.

TOTAL 100%.

Note: The return for each investment fund is directly related to the performance of the asset classes in which it is invested. The value of assets can go down as well as up. Past performance is not a guarantee of future performance.
