A) Default Target Date Fund Investment Option

The Target Date Funds comprise a series of funds of different ‘vintages’ (e.g. 2038 -2040), intended to match your selected retirement date. Each fund is managed with the aim of giving you the highest possible pension income after taking into account the number of years over which contributions will be made to your fund. The funds invest across a range of asset classes and the mix of assets in the fund will change over the life of the fund.

I wish the Default Target Date Fund Investment Option to apply to my personal fund (please tick here)

OR

B) Self-select Investment Option

I wish the Self-select Investment Option to apply to my personal fund and have indicated my selected investment funds below (please tick here)

Your choices must add up to 100%.

Please note: The return for each investment fund is directly related to the performance of the asset classes in which it is invested. The value of assets can go down as well as up. Past performance is not a guarantee of future performance.
